# URBAN DESIGN 2015

## FURNITURE FOR SMART URBANSCAPES

Anche quest'anno Citysi prosegue con rinnovato impegno nella sua ricerca progettuale sulla Città Positiva.

Lo spazio urbano è un organismo complesso che si evolve costantemente; il prodotto delle interazioni tra l'uomo e l'ambiente. Interazioni non sempre facilmente decodificabili, non sempre consapevoli, ma che traducono la città in un moltiplicarsi di nuovi orizzonti urbani affascinanti ma non sempre a misura d'uomo.

Lo spazio urbano a cui pensiamo, lo spazio "ordinario" in cui tutti i giorni ci muoviamo, è uno spazio che vogliamo non solo decodificare e comprendere, ma è anche uno spazio che vogliamo ci sorprenda, che diventi ogni volta "straordinario". Uno spazio che in ogni momento possiamo riconoscere come il nostro **paesaggio urbano**.

Il paesaggio urbano così come vorremmo interpretarlo, è fatto da oggetti la cui funzionalità, veicolata da un attento studio delle forme e dei colori si traduce inoltre in una spiccata attitudine **smart**.

In questo scenario, ci piace immaginare i nostri prodotti, orgogliosamente italiani dalla progettazione fino alla loro realizzazione, come manufatti a supporto di un'esperienza: la completa immersione dell'uomo in questa meravigliosa complessità che lo spazio urbano contemporaneo ci offre. Uno spazio che diventa così il paesaggio unico e straordinario di ciascuno di noi...

*Also in 2015 Citysi goes on with a renewed commitment to its research project on the Positive City.*

*The urban space is a complex organism that is constantly evolving; it is the product of the interaction between men and the environment. These interactions are not always easy to be decoded or conscious, but they bring the city into a multiplication of fascinating urban horizons that are not always on a human scale.*

*The urban space we are thinking about, the "ordinary" space we are moving in, is a space that we want not only to decode and comprehend but it's also a space that we want to surprise ourselves, a space that will become everyday "extraordinary".*

*A space that anytime we can recognize as our **urban landscape**.*

*The urban landscape, in the way we would like to interpret it, is composed by objects which functionality, driven by an accurate study of shapes and colors, is translated in a marked **smart** aptitude.*

*In this scenery we like to think our products, proudly italian from design to the production, as manufacts supporting an experience: the complete immersion of man in this wonderful complexity that the contemporary urban space is offering us. A space that becomes a unique and extraordinary landscape for each of us...*

# LINEA ECO | ECO PRODUCT RANGE

ECO è una linea di prodotti nata nel segno del rispetto per l'ambiente, del riciclo e della minimizzazione dei processi produttivi industriali. In una parola sola: sostenibilità.

La struttura delle panchine ECO è in acciaio, zincato per resistere agli agenti atmosferici ma senza ulteriori processi di verniciatura.

Seduta e schienale sono composte da una serie di profili in PVC espanso e farina di legno. Un materiale riciclato, riciclabile al 100%, autoestinguente e resistente alla corrosione causata dagli agenti esterni. Materiale certificato "Plastica Seconda Vita".

ECO ripropone alcuni classici Citysì dal design pulito ed elegante rivisitandone i materiali in chiave moderna e attualizzandone i contenuti tecnici.

*ECO is a product range developed thinking about the environment, recycle and minimization of production processes. Just in a word: sustainability.*

*The structure of the ECO benches is made of weatherproof galvanized steel without any further coating process.*

*Seat and back are made of a series of profiles PVC foam and wood powder.*

*A 100% recycled and recyclable material, flame retardant and resistant to corrosion caused by external agents. A material "Plastica Seconda Vita" certified*

*ECO is the re-make of some classical Citysì elegant and clean designed products, the ergonomics of the most classical park benches, but revisiting their materials in a modern key and an updated technical content.*
