NOTE INTRODUTTIVE

PARETE DIVISORIA EVOGLASS

Sistema di arredamento che in funzione della versatilità delle composizioni si presta per risolvere infinite esigenze di divisione degli spazi lavoro.
Le parti vetrate o lignee, non avendo moduli prefissati, sono espresse in Euro AL METRO QUADRATO.

Le partenze, i raccordi, le porte ed i mobili sono invece espressi a pezzo in base alla loro altezza. I prezzi sono espressi in Euro i.v.a. esclusa.

NOTE PER LA CONSULTAZIONE DEL LISTINO

La parete divisoria EVOGLASS è disponibile nella versione a vetro singolo (EVO, EVO LIGHT, EVO ULTRALIGHT) e a vetro doppio (D_LIGHT)

DIMENSIONI

Le altezze standard massime previste sono:
- **H.3050 mm.** con utilizzo di vetro spessore 5.5 e pannelli lignei
- **H.3600 mm.** con utilizzo di vetro spessore 6.6 (in questo caso la IVM S.p.A. si riserva di valutarne la fattibilità tecnica ed i relativi costi).

Le larghezze standard previste delle lastre di vetro vanno da un minimo di **300mm** ad un massimo di **1200mm**
Le larghezze standard dei pannelli lignei sia in Tamburato che in Conglomerato vanno da un minimo di **300mm** ad un massimo di **1000mm**
Lo spessore dei profili EVOGLASS è di:
- **35mm** (EVO)
- **28mm** (EVO LIGHT)
- **21mm** (EVO ULTRALIGHT)
- **55mm** (EVO D_LIGHT) - .

COMPONENTI DI SERIE INCLUSI NEI PREZZI DELLE TIPOLOGIE ELENCATE

Struttura composta da profilo a pavimento e soffitto in alluminio estruso completo di guarnizioni coestruse rigido/morbida per garantire un'elevata tenuta acustica sia tra profili e specchiature vetrate che tra profili e pavimento/soffitto, sistema di livellamento lastre vetro.
Specchiature Vetrate disponibili negli spessori 5.5 e 6.6, complete di profilo di giunzione verticale in alluminio o policarbonato trasparente.
Pannelli in conglomerato ligneo, nelle versioni:
- da applicare completi di biadesivo VHB ad alta tenuta,
- a tutta altezza truciolare (sp. 30mm) completi di profili in alluminio.

COMPONENTI DA AGGIUNGERE PER IL COMPLETAMENTO DELLE TRATTE

Ogni tratta delle parete deve essere completata, in funzione delle caratteristiche di progetto, aggiungendo:
- Profili di partenza o terminale fissi.
- Profili di partenza o terminale telescopici.
- Angoli fissi o variabili.
- Vani tecnici.
- Porte a battente nelle tipologie: vetro Temperato 10mm e 12mm, cieche in Tamburato e vetro 3.3 con telaio in alluminio.
- Porte scorrevoli vetro Temperato 10mm e 12mm.
- Accessori.

FINITURE ED ACCESSORI FUORI STANDARD

I prezzi delle finiture diverse dallo standard indicati nel presente listino sono INDICATIVI. La IVM S.p.A. si riserva di valutarne la fattibilità in base ai quantitativi richiesti.
I supplementi prezzi relativi alle finiture o a particolari tipologie di pannelli e alle finiture dei vetri, sono da intendersi per lato parete.
I prezzi relativi alla verniciatura o lucidatura dei profili in alluminio e gli accessori, sono da intendersi per entrambi i lati parete.

Per finiture, tipologie o colori non indicati nel presente listino si prega di contattare l'ufficio commerciale della IVM S.p.A. per la valutazionedella fattibilità tecnica ed eventuale offerta economica.

PARETE DIVISORIA EVOGLASS

VETRO

Le specchiature vetrate sono dotate di vetro trasparente stratificato di sicurezza spessore 5.5mm e 6.6mm.

MOBILI ATTREZZATA

Nel presente listino sono riportati i prezzi dei Top e delle Spalle di finitura speciali abbinati alla parete KARMA vetro singolo e vetro doppio. Per quanto riguarda i prezzi degli armadi consultare il listino Pareti Attrezzate "INFINITY".

The versatility of this furnishing systems means it can meet any number of workspace configuration needs.
Since there are no standard modules for the glass and wood parts, prices are given in Euros PER SQUARE METRE.

Prices for abutments, joints, doors and cabinets are given per item, based on height. Prices are indicated in Euro, exclusive of VAT.

EVOGLASS PARTITIONS

NOTES FOR THE PRICE LIST

The EVOGLASS partition is only available in the single-glazed version.

MEASUREMENTS

The maximum standard heights are:

H.3050 mm. with the use of 5.5mm thick glass and wood panels

H.3600 mm. with the use of 6.6mm thick glass (in this case, IVM S.p.A. reserves the right to assess the technical feasibility and associated costs).

The standard widths for the glass panels range from a minimum of **300 mm** to a maximum of **1200 mm**.
The standard widths for the wood panels, both hollow core and particle board, range from a minimum of **300 mm** to a maximum of **1000 mm**.
The EVOGLASS wall is **35 mm** thick.

PARTS INCLUDED IN THE PRICES FOR THE TYPES LISTED

Structure consisting of an extruded aluminium floor and ceiling profile, complete with rigid/soft co-extruded ABS seals to guarantee excellent soundproofing both between profiles and mirrored glass and between profiles and floor/ceiling, and a glass panel levelling system.
Mirrored glass available in thicknesses of 5.5 mm and 6.6 mm, including aluminium or transparent polycarbonate vertical joint profile.
Particle board panels, in the following versions:

- to be attached with VHB high surface energy double-sided adhesive tape,
- full-height in hollow core, including aluminium profiles.

PARTS TO ADD TO COMPLETE THE LENGTHS

Depending on the project features, each wall module must be completed by adding:

- Fixed start and end profiles.
- Telescopic start and end profiles.
- Fixed or adjustable corners.
- Technical modules.
- The following types of single-leaf doors: honeycomb core, toughened glass (10 mm and 12 mm), plain hollow core and 3.3mm glass with aluminium frame.
- Toughened glass sliding doors (10 mm and 12 mm).
- Accessories.

NON-STANDARD FINISHES AND ACCESSORIES

The prices for finishes other than the standard ones indicated in this list are APPROXIMATE. IVM S.p.A. reserves the right to access feasibility based on quantities requested.
Price supplements for finishes or special panel types and for glass finishes apply to one wall side.
Prices for painting or polishing aluminium profiles and accessories are for both wall sides.

For finishes, types and colours not found in this price list, please contact the IVM SpA sales office for a technical feasibility assessment and cost estimate.

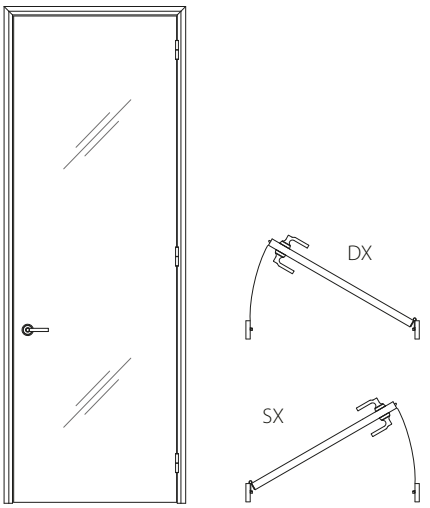
System for inserting doors into EVOGLASS partitions, both side-hung and sliding available. Some standard types of different heights have been prepared at set prices to simplify sales negotiations and orders.
Prices are indicated in Euro, exclusive of VAT.

WALL INSERTED DOORS

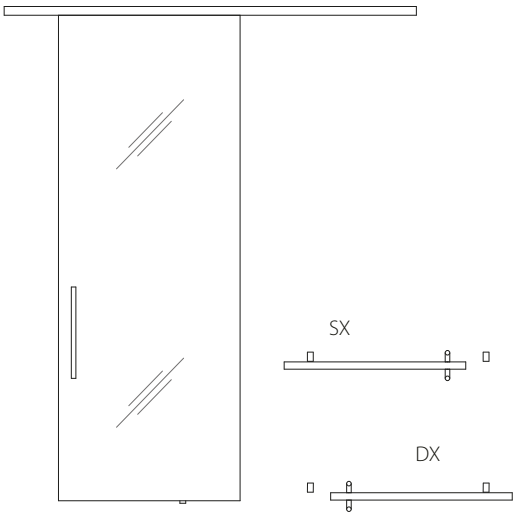
NOTES FOR THE PRICE LIST.

The doors open in the directions shown below:

SIDE-HUNG DOORS



SLIDING DOORS



MEASUREMENTS

The standard heights are:
- **H.3050 mm.** with 10 mm and 12 mm toughened glass, plain Hollow Core and Glass doors with Aluminium frames
- **H.3600 mm.** with 12 mm toughened glass

The standard widths are:
- **1000 mm.** single-leaf doors
- **2000 mm.** double-leaf doors
- **1000 mm.** single-leaf sliding doors - Net opening passage space 900 mm.
- **2000 mm.** double-leaf sliding doors - Net opening passage space 1800 mm.

The thickness of the door frame is **50 mm.**

TOUGHENED GLASS DOOR PANELS

Glass doors without aluminium frames are always toughened to make the glass up to 5 times more resistant than non-toughened glass.
Any dots, marks or "leopard spots" that show up on the surface only under certain light (anisotropy), should not be viewed as defects but as a sign that the glass was toughened.

WALL INSERTED DOORS

COMPONENTS INCLUDED IN THE PRICES FOR THE TYPES LISTED

SIDE-HUNG DOORS
Jamb casing consisting of an aluminium profile with Q-Lon seals on three sides and adjustable lock strike.

Flush side-hung door leaf:
- Aluminium pivot hinge 180° opening
- HCS Hoppe lock and handle

10 and 12 mm toughened glass side-hung door:
- Aluminium profile 180° opening
- HCS Hoppe lock and handle

Glass side-hung door leaf with aluminium frame:
- Aluminium pivot hinge 180° opening
- HCS Hoppe lock and handle

- 10 mm toughened glass side-hung door leaf with
- aluminium profile (one side - continuous hinge):
- Aluminium profile 180° opening
- HCS Hoppe lock and handle

10 mm toughened glass side-hung door leaf with aluminium profile (three sides):
- Aluminium profile 180° opening
- Stainless steel handle with lock on door upright

SLIDING DOORS
Jamb casing consisting of aluminium profile, integrated aluminium sliding rail with natural silver anodised finish end plate, rollers mounted on nylon wheels for smooth, silent movement, fitted with door adjustment system. Safety side stops. Aluminium callipers for the 10 mm and 12 mm glass panel versions.
Aisi 316 L. stainless steel pull handle, H.50 cm.

NON-STANDARD FINISHES AND ACCESSORIES WITH PRICE SUPPLEMENT
The prices for finishes other than standard ones are indicated in the EXTRAS section at the end of the price list.
Prices for finishes or special panel types and for glass finishes apply to both wall sides.
Prices for coating or polishing aluminium profiles and accessories apply to both wall sides.
Some finishes or types are subject to minimum quantities and/or assessment by IVM S.p.A.

Non-standard accessories:
- Flush side-hung door:
- - concealed hinge 180° opening
- - soundproofing system
- - ventilation grille

Glass side-hung door:
- pivot hinge 180° opening

Glass side-hung door with aluminium frame:
- sound absorption system

Upon request, it is possible to insert the single-gang switch into the door jamb.

For accessories, finishes, types and colours not found in this price list, please contact the IVM S.p.A. sales office for a technical feasibility assessment and cost estimate.

SIDE-HUNG DOOR HANDLES

BOISERIE

ATTREZZABILE

Come si sviluppa
un preventivo

Le configurazioni visualizzate rappresentano solo una minima parte di quanto la collezione **BOISERIE ATTREZZABILE** consente di realizzare.
Le mensole _ disponibili in alluminio _ e i contenitori vano_disponibili in laccato opaco bianco_ possono infatti essere liberamente posizionati grazie al profilo orizzontale in alluminio, a sua volta liberamente posizionabile sulla boiserie.
Quando non si utilizzano gli elementi pensili, è possibile inserire profili estetici orizzontali, sempre in alluminio. Lo 'scuretto' di circa 3 mm che si viene a creare, rappresenta sicuramente un interessante ed ulteriore effetto estetico.
La **BOISERIE ATTREZZABILE** è una collezione indicata per ambienti meeting e direzionali. Un progetto 'a schema libero' per la personalizzazione della parete vetro.

ATTENZIONE: i prezzi delle composizioni raffigurate sono calcolati con **finitura** del profilo **anodizzato** e con **pannello standard avorio**

BOISERIE

ATTREZZABILE

Come si sviluppa
un preventivo

The configurations only show some of the ways the **STORAGE WALL PANELLING** collection can be used.
The aluminium shelves and the storage containers _ avaible in matt white_ can be freely moved around thanks to the aluminium horizontal profile, which can in turn be freely positioned on the panelling.
Decorative horizontal aluminium profiles can be inserted when shelving is not used. The more or Less 3-mm dark line that these create adds an interesting, decorative effect.
The **STORAGE WALL PANELLING** collection is suitable for conference rooms and executive offices.
A 'free layout' project to customise the glass partition wall.

Anche nella configurazione standard, la boiserie garantisce un elevato impatto estetico. In questa variante, i profili estetici in alluminio che creano lo 'scuretto' di circa 3mm possono essere posizionati in senso orizzontale.

Grazie alla particolare struttura, inoltre, si possono utilizzare finiture diverse per i diversi pannelli della boiserie _ vedi soluzione A. Effetti cromatici per ambienti non omologabili.

CON SOPRALUCE VETRO**
*WITH TRANSOM WINDOW***

The standard configuration of the panelling is allo extremely stylish. In this version, the decorative aluminium profiles creating a more or less 3mm dark line can be positioned horizontally.

Not only that, but the special structure means different finishes can be used for the different panels - see optional A. Chromatic effects for non-standard enviroments.
